# Students descend on Los Alamos National Laboratory April 21-23 for Supercomputing Challenge expo and awards ceremony

April 16, 2013

Research by student teams to be showcased

NOTE TO EDITORS: Media are welcome to attend the awards ceremony from 9 a.m. to noon a.m., April 23 at the Church of Christ, 2323 Diamond Drive, Los Alamos.

LOS ALAMOS, N.M., April 16, 2013—More than 200 New Mexico students and their teachers will be at Los Alamos National Laboratory April 21-23 for the 23rd annual New Mexico Supercomputing Challenge expo and awards ceremony.

More than 60 teams of students from elementary, middle and high school are expected at the event, said David Kratzer of the Laboratory's High Performance Computer

Systems group and LANL's coordinator of the Supercomputing Challenge. While at the Laboratory, students will present their projects and take part in tours, talks, and demonstrations with Laboratory scientists.

Student projects will be recognized during an awards ceremony from 9 a.m. to noon, April 23 at the Church of Christ Auditorium, 2323 Diamond Drive in Los Alamos. Laboratory Director Charlie McMillan will present the top awards to the winning teams. More than $40,000 in scholarships will be awarded to student participants.

"The goal of the year-long competition is to increase knowledge of science and computing, expose students and teachers to computers and applied mathematics, and instill enthusiasm for science in middle- and high-school students, their families and communities," said Kratzer. The Challenge is project-based learning geared to teaching a wide range of skills: research, writing, teamwork, time management, oral presentations and computer programming. Any New Mexico middle-school or high-school student is eligible to enter the Supercomputing Challenge.

Kratzer noted the support of nearly 100 Los Alamos employees and another 50 individuals from Sandia National Laboratories, universities and business, who volunteer to work on the Supercomputing Challenge. "Without the support of these volunteers we couldn't provide the first-class event we do for the students who have worked so hard to get to this point. I am grateful for their assistance," he said.

More information about the New Mexico Supercomputing Challenge, including lists of student projects and sponsors, is on the Supercomputing Challenge web page: http://www.supercomputingchallenge.org
